

Suvil FreeAudio BT

"Extra-flat Bluetooth stereo earphones"

FreeAudio BT is the offering of **Suvil Technologies Corp.** in the conception of vanguard design with stereo Bluetooth earphones and micro.

The **FreeAudio BT** is extra-flat, foldable, easily transported and with excellent HIFI sound.

Leading design, the best quality and a super reduced size; Suvil wants its customers to enjoy its unique products. They are designed for listening to music with the new generation of Bluetooth MP3 mobile phones with the A2DP profile.

We can listen to our favourite music during more than 6 hours without recharging the battery and at a distance of up to 10 metres.

If, at a specific moment, we receive a call on our Bluetooth mobile whilst we are listening to music from the laptop, **FreeAudio BT** will inform us, allowing us to take the call; once the call is over, we can continue to listen to the music as we were doing before.

The price of the **Suvil FreeAudio BT** is **€24,95** including VAT.
