

Suvil "I-T" Click, Click BT

"The Mouse you control with your Finger and Thumb"

The **"I-T" Click, Click BT**, from Suvil Technologies, is an optical Bluetooth mouse operated with the index finger and thumb. The index finger presses the top button and is equivalent to the left button on a conventional mouse, while the thumb controls the side button and is equivalent to the right button.

The **"I-T" Click, Click BT** has been specially designed and patented. It is highly stylised with specially designed contours for an easier and more comfortable grip, lessening hand fatigue in the user.

The side button on the mouse is located a little behind the top button to match the natural position of index finger and thumb.

Also, when you put your hand on the mouse, the index finger moves naturally from the top down, while the thumb presses from the outside in to make a click.

Placing the buttons this way gives a highly stylised feel to the mouse.

The **"I-T" Click, Click BT** has a mini dual colour LED to indicate the mouse status. It flashes when the mouse battery is low, and is re-charged by plugging into a USB port on your computer while you carry on using it.

There are two energy saving modes: The first is the "rest" mode, which is activated automatically after 30 seconds without use. The mouse only consumes 1.5 mA in this mode, and can be returned to normal use by moving it or clicking on the top button.

After 5 minutes without use, the **"I-T" Click, Click BT** goes into "sleep" mode, with a consumption of only 0.3 mA. Clicking on the top button brings it back into normal use.

The **"I-T" Click, Click BT** has a resolution of 1.000 CPI.

There is a USB cable to recharge the battery from a laptop computer and an extension USB cable (male/female) if using a desktop.

The Suvil **"I-T" Click, Click BT** costs **€35** (incl VAT).

Product Specifications:

Type: Optical Mouse "Bluetooth" styled and shaped with buttons on the top and at the side.

Resolution: Optical sensor Avago 5030 1000 CPI.

Bluetooth Transmission: Chipset Broadcom 2042 - Bluetooth 2.0 Class 2.

Operating Frequency: 2.4 - 2.4835 GHz.

Operating distance: Up to 10 m (without obstacles).

Precision: + 95%.

Battery: Li-ion 350 mA (more than 5 working days between charges).

Recharging the battery: Via USB.

Cable length: 78 cm (mini USB male to USB male), for laptop.

Extension cable length: 1 m (USB female to USB male).

ON-OFF Switch/Synchronisation: At the bottom of the mouse.

2-colour Mini LED: Red (low battery), Blue (battery charging). Located on the side of the mouse.

Dimensions: 11.2 x 38.3 x 24.8 mm.

Weight: 41 grs.
